

# Table of Contents—2016

## UPPER LIMB

Bristow-Latarjet technique in anterior gleno-humeral instability	47
Lateral minimally invasive percutaneous osteosynthesis in humeral fractures	213
Total elbow arthroplasty for the treatment of distal humeral fractures in patients older than 65	84
Chronic posterior-lateral instability of the elbow. Ligament reconstruction	294
Treatment of displaced fractures of the clavicle middle-third with pre-contoured locking plate	302
Medical-radiological results in young patients with complete joint fracture in distal radius treated with locking palmar plate	42
Percutaneous osteosynthesis with locking palmar plate in metaphyseal fractures of the distal radius. Technique description and preliminary results	76

## LOWER LIMB

What nobody told you about femur fractures	99
Peri-implant femoral fractures treated with retrograde nailing—Case report and description of the surgical technique	53
Fracture around previous extra-medullary osteosynthesis in proximal femur. A simple solution for a complex problem	110
Hip revision in Paprosky II and IIIA femoral bone defects. Modular non-cemented prosthesis of proximal fixation and distal anchorage	115
Hip total hybrid replacement with polished and tapered stem, modern cementing techniques and ceramic-ceramic bearings. Analysis of complications	190
Use of extensively porous femoral stems in hip revision	199
Hip lateral fractures. First 100 cases treated with the stabilization system of percutaneous compression plating	206
Salvage in hip inter-trochanteric fractures with AO/ASIF 95°-nail plate	281

Treatment of types B2 and B3 peri-prosthetic fractures with distal fixation non-cemented stems	287
Penetration of anterior-lateral cortex in proximal femur fractures treated with short intramedullary nails: Report of two cases	139
Treatment of objective femoro-patellar instability	35
Bilateral and spontaneous detachment of the quadriceps tendon	57
Total knee arthroplasty in severe knee valgus deformity—5- to 14-year follow-up	177
MRI evaluation of symptomatic total knee arthroplasty	170
Spinal vs. intra-joint anesthesia in knee arthroscopy	258
Range of motion and functional results in three different designs of primary knee arthroplasty. Comparative study	264
Reconstruction and restoration in acute rupture of the patellar tendon with semitendinosus augmentation sparing its distal attachment. Case report	315
Ankle fracture. Comparison between open surgery and minimally invasive methods	27
Osteosynthesis of ankle fracture. Evolutive analysis with early weight bearing. Preliminary study.	93
Feet gouty tophus as a Morton's neuroma pretender	228
Comparison between open surgery and minimally invasive methods in Achilles tendon rupture	274

## SPINE

MRI analysis of cerebellum amygdale position before and after posterior instrumented correction in patients with adolescent idiopathic scoliosis	2
X-ray checkup in surgery of adolescent idiopathic scoliosis. Evaluation of post-operative follow-up	14
Changes in lumbar lordosis following posterior thoracic spinal fusion and its relationship with the pelvic incidence	122

Post-traumatic lumbosacral unilateral facet dislocation **232**

Taping combined with Spinal School in patients with chronic low-back pain—Randomized controlled clinical trial **250**

Cervical spine fractures with previous extensive arthrodesis—Treatment by triple vertebral body removal plus circumferential arthrodesis **143**

### **TUMORS**

Treatment of aneurysmal bone cysts with allograft **128**

Therapeutic approach of myelo-lymphoproliferative neoplasia in the spine **7**

Epidemiologic behavior of osteosarcoma in Mexican population from 2005 to 2014 **219**

### **PEDIATRICS ORTHOPEDICS**

Pedicle flaps for soft tissue defects in children **20**

### **GENERALITIES**

Vitamin D levels in unhealed fractures **163**

Fat embolism syndrome with prevalence of neurological symptoms **310**

### **POST-GRADUATE ORTHOPEDICS INSTRUCTION - IMAGES**

Second Part: ACL muroid degeneration **64**

Case Report **66**

Second Part: Extensor pollicis longior (EPL) tear as a complication of distal radius fracture. **148**

Case Report **151**

Second Part: Avulsion fracture of the anterior-superior iliac spine **236**

Case Report **239**

Second Part: Elastofibroma dorsi **321**

### **EDITORIALS**
